

Medical Skills (MS)

- In October 2008, in an effort to address California's nursing shortage, the Panel implemented a Pilot to support the healthcare industry. Since then, Medical Skills Training has become a regular part of the Panel's program.
- The Panel funds medical skills (MS) training for the career advancement and job security of incumbent Registered Nurses (RNs) and Licensed Vocational Nurses (LVNs).
- MS Training consists of Didactic (Classroom) and Preceptor (Clinical) Training.
 - Didactic Training must meet ETP's class/lab training requirements, however the 10% restriction on Productive Lab is not applicable.
 - Preceptor Training is training by a Preceptor/mentor where the trainee observes hands on skills performed by a registered nurse or other practitioner in a productive work environment. Training is typically provided at 1:1 preceptor/trainee ratio, not to exceed 1:10. Training may consist of 100% Preceptor.
- Fixed-fee Reimbursement rate is \$22 per hour for Didactic and or Preceptor training.

For further information regarding this program, please contact the ETP Regional Office in your area.
